

TransformFactory

```
classDiagram
    class TransformFactory
    class ManualTransformFactory
    class TfTransformFactory
    ManualTransformFactory --|> TransformFactory
    TfTransformFactory --|> TransformFactory
```

The diagram illustrates a class hierarchy. At the top is the 'TransformFactory' class. Below it are two subclasses: 'ManualTransformFactory' on the left and 'TfTransformFactory' on the right. A horizontal line connects the two subclasses, with a vertical line extending upwards from its center to an arrowhead pointing at the 'TransformFactory' class, indicating that both subclasses inherit from the base class.

ManualTransformFactory
